# Security Features

*The Best Check Stock You Can Buy...At a Price You Can Afford!*

DFI's Laser Check Stock is loaded with 7 Anti-fraud features built into the stock for added protection. DFI's program features secure laser documents with check at the top, in the middle and at the bottom.

1

## Overt Warning Band

Documents obvious security features for easy verification.

THE FACE OF THIS DOCUMENT HAS A COLORED BACKGROUND ON WHITE PAPER-THE BACK OF THIS DOCUMENT CONTAINS AN ARTIFICIAL WATERMARK-HOLD AT ANGLE TO VIEW

2

## Border Microprinting

Words are printed so small that they appear as a line to the naked eye. Only when magnified do the microprinted words become visible, making it extremely difficult to duplicate with a copier or scanner.

3

## Copy-Ban Pantograph

A repeated background design that is exposed when scanned or copied.

4

## Erasure Protection

When erased, color pantograph becomes white.

## Check 21 Image Ready

When a financial institution stores checks for the data to take up a small amount of storage space and be readable. Through the use of passive inks with a neutral finish, our checks assure the smallest image size possible and reduce background clutter to make the check readable yet secure.

5

## Consecutive Numbering

Back of checks feature a consecutive number in red.

6

## Printed Laid Lines

Closely spaced watermark lines on the backer that make all alterations easy to detect.

7

## Simulated Watermark

Printed with white ink, simulated watermark show a different reflectance than the base paper and can be seen at an angle. Because the ink is white, it cannot be photocopied or scanned.

## *Additional Security Features You Can Add*

**THERMOCHROMATIC INK** - Image or print disappears when heated or rubbed with your thumb.

**TONER ANCHORAGE** - Special coating allowing laser toner to adhere more effectively.

**ULTRAVIOLET FIBERS** - The fibers glow under UV lighting.

**65-CHEMICAL SENSITIVE** - When alterations are attempted by solvents, checks change colors and reveal VOID in nine different languages.

**PRISMATIC TWO-COLOR PANTOGRAPH** - A multi-color background in which two colors blend into each other making color copying more difficult.
